

Author Page Guidelines

This document explains the guidelines for preparing the data needed for your Author Pages. Please follow these instructions to gather information for each author that you submit an eBook for.

Author Photo

Image format: JPG

Image size: The width of the photo must be at least 180 pixels. The height of the image is variable, but the photo must be portrait-oriented, so that it is taller than it is wide.

Author Bio

The author biography should be written to trigger the reader's curiosity. We don't currently enforce a maximum word limit, but reserve the right to shorten or rewrite if we think this is necessary. We recommend that the bio be written in the third person. It can include any information that you wish, but keep it family-friendly and generally centered around the topic of your background, books and writing.

Twitter

If your authors have a Twitter account, we can display their recent tweets on their author page. All we need is the part that appears after the @ symbol, i.e. @eBookMallcom

How To Submit

Send an email with the above data to submissions@ebookmall.com. In your email, please include the name of the author as it appears on our website. The author photo should be included as an email attachment, and the bio and Twitter information can be in the body of the email. If you want to submit multiple authors at once you can also collect all information in a Word document or Excel spreadsheet.

It is important that you follow these guidelines when preparing this material because incorrectly formatted materials won't display on the website correctly. Please contact us if you have any questions.
